

THE INSTITUTE FOR CONNECTED COMMUNITIES

# ICC EVALUATION UNIT

## Involving UEL Students in Applied Research and Evaluation

The University of East London (UEL) has a long and proud tradition of being a civic university and we will build on this. The ICC Evaluation Unit is based in the Institute for Connected Communities and is made-up of a multi-disciplinary team of academics and associates able to undertake high quality evaluations. The goal of the Unit is to serve as an evaluation exchange connecting UEL researchers /thought leaders to organisations in the public, private and third sector. We engage with all the schools, university structures and work with the research and development team to ensure the Evaluation Unit fosters a system-wide approach. We aim to demystify research and evaluation processes and support the growth in evidence-based decision making to help build safer and more resilient communities.

**We provide opportunities for students to gain skills and build knowledge in research and evaluation.**

- › We provide you with experience in doing real world research.
- › We provide paid placements and UEL Funded Internships.
- › We provide coaching and mentoring to build research skills and understanding.
- › We facilitate links with industry and future employers.
- › Working with us will help build the foundations for postgraduate study at UEL.
- › We will help you shape a research portfolio and CV.

## RESEARCH THAT MATTERS
